Data Flow Diagram

Create a Data Flow Diagram (DFD) to show how data moves through your system - between external entities, processes, and data stores. Use the symbol legend below as a guide.

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded shape	External Entity	User (Student/Learner) who uploads an audio explanation and receives evaluation results and the PDF report.
Rectangle with numbered header	Process	Performs operations such as Speech-to-Text Transcription, Semantic Analysis, Audio Feature Extraction, Score Calculation, and PDF Report Generation.
Rectangle (solid fill, no number)	Data Store	Stores uploaded audio files, reference concepts, transcripts, evaluation scores, feedback, and generated reports in the database.
Labeled arrow	Data Flow	Represents the movement of data such as audio files, transcripts, semantic scores, audio features, evaluation results, feedback, and PDF reports between the user, processes, and data stores.

Example

The diagram below illustrates how the symbols above come together to form a complete data flow diagram.
